Social Isolation and Salary | Survey 2025

High Burnout Rate by Social Isolation Score and Work Arrangement

High Burnout Rate by SalaryRange and Work Arrangement

Salary_Range	Hybrid	Onsite	Remote
$40K-60K	39.0%	28.9%	46.3%
$60K-80K	34.6%	25.0%	43.0%
$80K-100K	34.7%	27.3%	48.6%
$100K-120K	37.2%	24.8%	48.7%
$120K+	35.4%	28.3%	48.7%

Key Findings:

Remote employees have the highest high-burnout rate (46.4%), compared with hybrid (35.7%) and onsite employees (26.4%). Remote employees also report the highest average social isolation score (3.5 out of 5). Across all salary ranges shown, remote workers have higher burnout rates than the other groups.
